

Diamond Peak Ski Patrol

Medical Treatment Protocol

Ordering a Sled from Dispatch

Just a quick note to remind everyone that ALL of the sleds will be equipped as backboard sleds this season (2002/2003). There will be NO quick-splint sleds.

The protocol for asking for a sled has changed only slightly.

Simply ask for a sled as you usually do, giving your location, etc. If this is a backboard injury, state so in your radio call. This should then give you the same response as if you had asked for a backboard sled in the past. You will still need to ask for the Trauma Pack separately. Also, remember, all backboards are 10-53's and you need to provide the dispatcher with the age, gender and nature of injury for the paramedics.
